Where science and nature meet

Henriëtte Faroche has a very extensive skincare line in which all of the products have one thing in common: the power of nature. It's the ancient science of natural ingredients combined with the latest and most modern insights into skin care.

The comprehensive skincare line offers products for every skin type and also has various special care products that can be used as a supplement. The line with Faromatiques is unique in the Henriëtte Faroche range. Concentrates based on essential oils, plant extracts and vitamins suitable for specific skin types.

Home Care

Every skin is unique. By means of a skin analysis, the Henriëtte Faroche Beautician can draw up a personal treatment plan and advise you on which products are most suitable for your skin. The Henriëtte Faroche products for home use perfectly complement the salon treatments, thus supporting each other's effect.

The Henriëtte Faroche products and treatments can be divided into three levels; basic; optimised and specialised. To keep the skin active and alert, you can switch between the different levels. In addition to this, there are the Intégral, Intense and Soleil Intensif lines.

Hydrasence

The Hydrasence line of Henriëtte Farache is particularly suitable for dry and dehydrated skin. This skin type has fine, barely visible pores and sometimes flakes can be visible. At times, the skin may also feel chapped and tight.

Dry, dehydrated skin has difficulty retaining moisture and sebum production is also low. The Hydrasence line is aimed at restoring the skin barrier so that the skin is better able to attract and retain moisture.

Matifiante

The Matifiante line has been specially developed for combination and oily skin. This skin type is characterised by large pores and excessive sebum secretion, which can make the skin shiny during the day. Impurities such as comedones and pimples may also be visible. In the case of combined skin, this is particularly evident in the T-zone.

This skin type requires consistent and intensive care. The Matifiante line of Henriëtte Faroche brings the combined, oily and impure skin back into balance.

Sensilence

The Sensilence series by Henriëtte Farache is aimed at (very) sensitive skin. This skin type reacts quickly to external influences such as heat, cold or dry air, but also to soap and alcohol. This manifests itself in the form of redness, rash, itching or flakes. Sensitive skin needs protection.

The Sensilence line softens and soothes red and irritated skin. It supports the barrier function of the skin, making it more resistant to external influences.

Collastine

The collastine and elastin production in our skin begins to decrease slowly from the age of 25. This makes the first signs of skin aging visible, such as fine lines and incipient wrinkles. Although skin aging cannot be stopped, this process can be delayed with the proper care.

The Collastine line with marine collagen is suitable for the skin that is beginning to show the first signs of skin aging. This line contains products for dry and sensitive skin as well as for mixed to oily skin.

Brilliant

The Brilliant line based on vitamin E is particularly suitable for thin, sensitive and mature skin. The skin is sensitive to external influences such as sun, wind and cold, but also to soap and alcohol. Fine red lines are also often visible, especially around the nose and on the cheeks, so-called telangiectasies.

Vitamin E helps protect the skin from external influences. In addition, it is an antioxidant that can help slow down the skin aging process. This ingredient also has a strengthening effect on the blood vessels and helps to treat telangiectasies.

Farorisan

Fruit acids have various positive effects on the skin. For example, they remove dead skin cells and in doing so prevent a dull, matte appearance. They also keep the epidermis thin and prevent the formation of impurities. In addition, they stimulate cell renewal. The result is a radiant, fresh and smooth skin.

Curious what fruit acids can do for your skin? Then try the Farorisan line based on fruit acids!

Active Age

More than 50% of the skin consists of ceramides; fats that occur naturally in the skin. Ceramides protect the skin from harmful external influences and moisture loss. In addition, they keep the skin supple and soft. The natural production of ceramides decreases as we age and its quality also decreases.

The Active Age line contains skin's own phospholipids and sphingolipids. These natural skin ingredients can penetrate deeper into the skin layers. They can also stimulate the skin in the production of ceramides.

Vitamine C

Vitamin C is one of the most studied cosmetic ingredients. Vitamin C is essential for the formation of collagen. Without collagen, the skin loses its firmness and loosening occurs. In addition, vitamin C is an important antioxidant that helps protect the skin from harmful free radicals. In addition, vitamin C can also limit UV damage.

Thanks to its many positive effects, vitamin C is a particularly valuable ingredient and therefore indispensable within the Henriëtte Farouche range. Choose one of the various home care products or give the skin a true vitamin C boost with the Vitamin C Spa Lift-off treatment.

Caviar Derma Concept

Surely your skin deserves the very best?! The Caviar Derma Concept line with caviar extracts is the most luxurious, exclusive line within the Henriëtte Farouche range. Caviar contains vitamins A, D and E and gives the skin an energy boost. Tired skin becomes firmer and shinier with a soft appearance.

The high-quality ingredients in the Caviar Derma Concept line nourish and care for the skin intensively. The result is a radiant, fresh and even complexion.

FaroTherm

The FaroTherm treatment is an intensive anti-aging treatment in which a modeling plaster mask is used. The plaster mask closes the skin so that the temperature under the mask rises and the blood flow is stimulated. In addition, this ensures that the active ingredients of creams, masks and serums which are applied under the mask can penetrate deeper into the skin.

Protection & Anti-aging treatment

The Protection & Anti-aging treatment is the ideal boost for the skin. This mask contains rich ingredients such as cranberry, strawberry, blackcurrant and raspberry and is a real vitamin boost for the skin. The red fruit contains a high dose of antioxidants that protect the skin from free radicals and delay skin aging.

Faromatique

Henriette Faroche has combined specific natural oils, essential oils, plant extracts and vitamins so the Faromatiques are problem-solving for specific skin problems. An ancient science of pure products combined with the latest and most modern insights in skin care. There are four different concentrates, tailored to each skin type. The Henriette Faroche Beautician can advise you which Faromatique concentrate is suitable for your skin type.

Hydrasence

Nourishing and hydrating concentrate with macadamia oil that cares of dry skin. The concentrate is enriched with vitamins A, E and F and essential oils of ginger and lemon.

Matifiante

Nourishing and hydrating concentrate with Borage oil that takes care of oily/impure skin. The essential oils of rosepelargonium, lemongrass and spearmint are known for their positive impact on oily/impure skin.

Sensilence

Nourishing and hydrating concentrate with avocado oil that cares for sensitive skin. The concentrate is enriched with vitamins E and F and essential oils of real lavender and Italian cypress.

Brilliant

Nourishing and hydrating concentrate with almond oil that benefits mature skin. The concentrate is enriched with vitamins A, E and F, essential oils of orange and extract of carrot.

Intégral

Good skin care starts with a good cleansing. The Intégral line consists of various products for cleansing the skin and removing make-up. The Intégral products can be used in addition to the basic, optimised and specialised lines. Your Henriëtte Faroeche beautician can advise you on the Intégral products that are most suitable for your skin type.

Intense

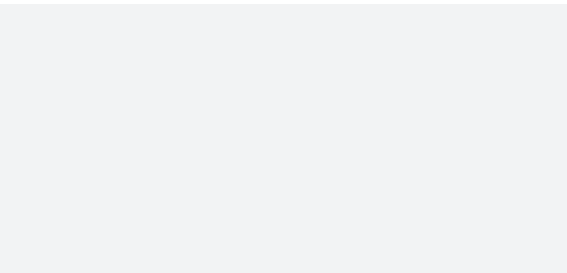

The Intense line contains various products that have been specially developed to give the skin an extra boost such as mask and ampoules. The Intense products can be used in addition to the other Henriëtte Faroche lines. For example, give the skin an extra boost, tackle a specific problem or optimize your skincare routine. Your Henriëtte Faroche beautician can advise you on the Intense products that are most suitable for your skin type.

Soleil Intensif

The sun, or rather UV radiation, is one of the main causes of premature skin ageing. Think of the appearance of fine lines, wrinkles and pigment spots. The products within the Soleil Intensif line have been specially developed to protect the skin while sunbathing. In addition, they contain various ingredients that nourish the skin at the same time. And almost as important as good protection during sunbathing, is intensive care after sunbathing.
